

Summary

Results driven **Software Developer** with **1+ years** of hands on experience building scalable applications using **Java, Spring Boot**, and **Microservices** architecture. Proficient in designing and consuming **RESTful APIs**, managing relational data with **PostgreSQL** via **JPA/Hibernate**, and accelerating throughput with **Redis** caching. Experienced with **Docker, Kubernetes**, and **CI/CD** pipelines (Jenkins), and comfortable working in **Agile** environments.

Experience

VideoGate Technologies Pvt Ltd (Toqqr)

Software Developer (Full Time)

Sept. 2025 – Present

Hyderabad (Onsite)

Core Feature Contributions (Scaling & Enhancing)

- Contributed to scaling the core **VOD streaming platform** by optimizing **Java, Spring Boot**, and **Microservices**, enabling growth from **50K** to **250K+ concurrent users** during peak live events.
- Enhanced authentication security by integrating **JWT** authentication and **DRM** license validation, reducing unauthorized content access by **15%**.
- Optimized legacy **PostgreSQL** queries and tuned **HikariCP** connection pools, reducing payment processing timeouts by **40%**.
- Collaborated on implementing **Server-Side Ad Insertion (SSAI)** into the OTT playback pipeline, increasing ad monetization efficiency by **22%**.
- Supported migration of a monolithic user profile service to **AWS-hosted Microservices**, improving deployment speed while reducing cloud infrastructure costs by **18%**.

Production Bug Fixes & Stabilization

- Diagnosed and resolved critical **JVM** memory leaks and **Out-of-Memory (OOM)** issues, improving platform availability from **98.2%** to **99.9%**.
- Eliminated concurrency race conditions using distributed locking with **Redis**, preventing duplicate coupon redemption and protecting over **\$12K** in revenue.
- Integrated **Resilience4j Circuit Breakers** for third-party services, reducing user-facing playback failures by **35%**.
- Optimized legacy **PostgreSQL** queries and implemented **Redis** caching, reducing API response latency from **850 ms** to under **180 ms**.
- Resolved offline playback synchronization issues, ensuring **100%** consistency of watch history and DRM status after network reconnection.
- Introduced automated testing using **JUnit** and **Mockito**, increasing test coverage from **20%** to **75%** while preventing production regressions.
- Streamlined **Docker** environments and **Jenkins CI/CD** pipelines, accelerating feature delivery by approximately **3 days per sprint**.
- Containerized backend services with **Docker**, orchestrated deployments using **Kubernetes**, and automated releases through **Jenkins CI/CD**, reducing deployment time by **50%**.

Maple Technology Pvt Ltd

Network & Security Engineer (Contractual Role)

Jan 2025 – Aug 2025

Kolkata (Hybrid)

- Designed, implemented, and maintained secure enterprise network infrastructure comprising **50+** routers and switches using **CCNA** networking principles, improving network availability to **99.8%**.
- Configured and optimized **20+ VLANs, STP, OSPF**, and **EIGRP**, reducing network downtime by **25%** while improving traffic efficiency.
- Strengthened enterprise security by managing **Firewalls, VPNs**, and role-based access controls while resolving **100+** network incidents through root cause analysis, improving incident resolution time by **35%**.
- Automated system administration, log analysis, and network health monitoring using **Bash, grep**, and **awk**, reducing manual effort by **40%** and accelerating troubleshooting by **30%**.

Technical Skills

Languages :	Java (Primary), Python, JavaScript
Frontend :	Angular, React.js, TypeScript (basic), Threejs
Backend :	Spring Boot, Spring Framework (MVC, Security, Data), Microservices Architecture, RESTful API Design, JPA/Hibernate, Maven, RabbitMQ, Apache Kafka, Node.js, Express.js
Databases :	MySQL, PostgreSQL, MongoDB, Redis (Caching, Pub/Sub, Queues)
Cloud & DevOps :	AWS (IAM, EC2, VPC, CloudWatch), Docker, Kubernetes, CI/CD (Jenkins), Git, Bitbucket
Concepts :	SOLID Principles, Design Patterns, JWT/OAuth2, Rate Limiting, Idempotency, API Versioning, Background Jobs, Observability
Testing & Quality :	JUnit, Mockito, API Testing (Postman), Debugging, Performance Optimization

Education

Heritage Institute of Technology <i>Master of Technology in Applied Electronics and Instrumentation (AEIE)</i>	Aug 2022 – June 2024 <i>Kolkata, WB</i>
University of Engineering and Management <i>Bachelor of Technology in Electronics and Communication (ECE)</i>	Sept 2018 – July 2022 <i>Kolkata, WB</i>

Projects

Steel Surface Defect Detection Using Deep Learning Algorithm	Aug 2023 – May 2024
- Architected an end to end defect detection pipeline using Convolutional Neural Networks (CNN), achieving up to 95.83% accuracy on benchmark industrial datasets. - Leveraged TensorFlow, Keras, NumPy, Pandas, and Matplotlib for model development, data preprocessing, and result visualization; applied Confusion Matrix analysis to minimize false positives. - Reduced model inference error rate by iterating on hyperparameter tuning and data augmentation strategies across 3 architecture variants.	

Portfolio Website	Jul 2024 – Sept 2024
- Engineered a fully responsive frontend using React.js, Tailwind CSS, and HTML/CSS, implementing dynamic routing and reusable component architecture for an optimized user experience. - Built a lightweight Node.js/Express.js backend with validated API endpoints for contact form handling and secure server side data management. - Applied responsive design principles ensuring 100% cross-device compatibility across desktop, tablet, and mobile viewports.	

E-Commerce Printing Press Website	Oct 2024 – Feb 2025
- Designed and developed a production-ready full stack e-commerce platform for customized merchandise orders (T-shirts, cups, mugs) with end to end order lifecycle management. - Built a secure Node.js/Express.js backend exposing RESTful APIs for product catalog, cart management, and order processing, following MVC architecture patterns.	

Certifications

- **Data Analytics with Python** – NPTEL, IIT Kanpur
- **CCSA & CCVS** – NetGems.in
- **AWS For Beginners** – Great Learning
- **MySQL Basics** – Great Learning
- **AI and Data Science for Industrial Applications** – CSIR-CMERI, Durgapur

Achievements

- Qualified **GATE-2022 (ECE)** – **91.82 Percentile**.
- HackerRank Badges: **Gold** (Python, SQL); **Silver** (Problem Solving, Java).
- **LeetCode**: Solved **500+** DSA Questions

Research Publications

- **“Steel Surface Defect Detection Using Deep Learning Algorithm”** – Complete detection pipeline achieving **95.83% accuracy**; code and dataset publicly released. **IEEE Transactions**.
